PROFESSIONAL SUMMARY

Senior full-stack engineer with 6+ years building scalable products in Ruby on Rails, React, Vue.js, and PostgreSQL. AI-enabled in my workflow — I use generative AI and AI agents to move faster through design, development, and debugging without sacrificing code quality. I've also built AI agents and LLM integrations for production use cases, adding an extra edge when the product itself calls for it.

TECHNICAL SKILLS

Backend: Ruby on Rails, GraphQL, PostgreSQL, MySQL, Redis, Sidekiq, Shopify App

Frontend: React, Vue.js, JavaScript, HTML, CSS, Bootstrap

AI/LLM: AI Agents, RAG, LangChain, OpenAI/Claude API, LLM Integrations, Workflow Automation, RPA

Cloud/DevOps: AWS, Docker, GitHub Actions, CircleCI, Capistrano, Git, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Aug 2023 - Present

Tkxel

- Built an RPA system that automated contact sync deduplication across multiple data sources, eliminating manual data entry and reducing sync errors.
- Developed a discovery call agent to assist with client discovery calls, streamlining requirement gathering during business conversations.
- Built an AI agent using RAG and LangChain to support contextual retrieval and intelligent workflow automation.
- Improved automated test coverage by 30% and reduced user-reported errors by 70%, increasing product stability and release confidence.
- Modernized the main ordering module by replacing scraper-based workflows with API-based integrations, improving reliability, maintainability, and user experience.

Senior Software Engineer / Team Lead

Jun 2021 - Jul 2023

IIFA Tech

- Led multiple SaaS product development projects and coordinated teams of up to 10 engineers across planning, implementation, delivery, and client communication.
- Built MVPs and production-ready web applications that helped clients validate business ideas and support investment conversations.
- Designed AWS server setups, deployment scripts, and CI/CD pipelines using GitHub Actions and CircleCI for reliable automated releases.
- Configured AWS EC2 infrastructure and deployment automation, reducing manual release effort and improving operational consistency.
- Reviewed code, guided team members, managed implementation priorities, and ensured delivery aligned with scalability and maintainability goals.

Software Engineer - Contractor, Remote

Mar 2022 - Jul 2022

IUCN

- Supported SIS-Connect species assessment uploads, reducing data errors by 25% and achieving 90% compliance with required formatting standards.
- Enhanced IUCN Red List functionality by implementing one-click citation copying, improving usability for researchers and platform users.
- Updated species and Green Status assessment data and performed Elasticsearch indexing, reducing search query response time by 50%.

Software Engineer / Shopify Developer

Mar 2021 - Aug 2021

Codverse

- Developed and maintained Shopify apps to enhance store functionality, sales workflows, and customer engagement.
- Built a Chrome extension for product scraping from Shopify stores, strengthening product research and market analysis capabilities.
- Integrated backend and frontend features for e-commerce use cases using web technologies and API-driven workflows.

Software Engineer

Sep 2019 - Aug 2020

Qbatch

- Built backend features with Ruby on Rails, integrated APIs, and wrote test cases to improve reliability and maintainability.
- Developed responsive frontend interfaces with HTML, CSS, and jQuery for cross-device compatibility.
- Optimized database queries and reduced response time by 40% for datasets exceeding 10 million records.

EDUCATION

Master of Computer Science

2020 - 2024

University of Engineering and Technology | Lahore, Pakistan

Bachelor of Computer Engineering

2015 - 2019

University of Engineering and Technology | Lahore, Pakistan
